About Electronic Materials Office

Electronic Materials Office is a future oriented consumer hardware corporation. It manufactures and sells thoughtfully designed and long lasting electronic objects.

The world is out of time when it comes to environment, waste and global warming, thanks in large part to the electronics industry. Electronic Materials Office places sustainability at its core by designing items to last, using sustainable materials, and eliminating waste.

About Altar I

Altar I — Electronic Material Office's debut product — is a low profile, wireless mechanical keyboard made from premium, sustainable materials. It features a bold design, novel key shape and a rotary encoder knob, all enclosed in a sleek aluminium monobody.

Altar I features

- Ultra low profile design of only 15mm
- Bluetooth wireless, remembering up to 2 devices
- Novel key shape, enabling easier touch typing
- Rotary encoder knob
- Aluminium monobody
- Plastic made from post consumer waste
- Available in U.S. and U.K. layouts
- USB C

How will Altar I be sold?

The design of Altar I is currently being finalised and prepared for production. Once this is complete, pre-orders for Altar I will open to everyone.

When will pre-orders open?

Pre-orders for Altar I are anticipated to open at the beginning of 2023.

When will Altar I ship?

Altar I is expected to begin shipping in 2023.

Who founded Electronic Materials Office?

Electronic Materials Office was founded by Andrew Emerson, a product designer with 10 years experience working in EV, automotive, healthtech, fashion, and music industries.
